EDUCATION

University of Waterloo

Waterloo, ON

Candidate for Bachelor of Computer Science (Honours, Co-op), Sep 2026 to Apr 2031. Seeking Summer 2027 internship (first work term).

Victoria Park Collegiate Institute

Toronto, ON

IB Diploma, Sep 2022 to Jun 2026.

PROJECTS

OlympiQ | Next.js, TypeScript, Firebase, Firestore | olympiq.ca

Sep 2025 to present

- Built and launched a Science Olympics team-management platform used by 60+ competitors, with role-based access for teachers, executives, and competitors.
- Implemented event scheduling with automatic conflict detection and Excel export, and preference-based automatic competitor-to-event assignment.
- Shipped solo from design to production across 100+ commits, including Firestore security rules and role-based onboarding with team codes.

Flowboard | Next.js, React 19, TypeScript, React Flow, Zustand, Anthropic API

JamHacks 2026

- Built a codebase onboarding tool that scans a GitHub repository and renders folders, files, and functions as an interactive dependency graph.
- Grounded an AI assistant in repository context (file hierarchy, visible graph nodes, and code excerpts) so answers reference the actual codebase rather than generic advice.

TeacherAid | Firebase, Firestore, Claude API, Cloudflare Workers

GenAI Genesis 2026

- Built a classroom analytics platform that classifies misconceptions from students' written reasoning and aggregates them into class-wide dashboards with reteach suggestions.
- Proxied Claude API calls through a Cloudflare Worker to keep credentials server-side, with rate limiting and Firebase App Check.
- Added adaptive question generation that targets the class's weakest concepts automatically.

FrostByte | Next.js, Node.js, Firebase, Gemini API

Hack Canada 2025

- Won Best Use of Gemini AI or Gemini API for a web app that estimates frostbite and hypothermia risk from live weather and clothing input, with safe-exposure time limits.

EXPERIENCE

Kurius (nonprofit) | C++ Instructor and Outreach Coordinator, Remote

Dec 2023 to present

- Taught a 5-week Introduction to C++ course to 14 university students; by the end, beginners were confidently shipping functional C++ programs.
- Reached out to 200+ companies to secure sponsorships and partnerships for the 2,200+-member organization.

Science Olympics Team, Victoria Park CI | Head Trainer

Sep 2023 to Jun 2026

- Led a team of 6 trainers; all 4 junior teams coached placed 1st at Western University's Science Olympics.
- Created the team's first structured training program and recruited experienced competitors as trainers.
- Then developed OlympiQ, which now runs scheduling and signups for the team.

AWARDS

- Canadian Computing Competition (Senior): Distinction, 2024, 2025, 2026
- DMOJ top 2% (300+ points); Codeforces rating 1200+; USACO Silver Division; 500+ problems solved
- CALICO Bronze, 2024
- Best Use of Gemini AI or Gemini API, Hack Canada 2025
- 1st place team, St. Lawrence Coding Competition 2024

SKILLS

Languages: C++, Java, Python, TypeScript, JavaScript, HTML/CSS

Frameworks and tools: React, Next.js, Node.js, Tailwind CSS, Firebase, Cloudflare Workers, Spring Boot, Git/GitHub
