Education

University of Waterloo — Waterloo, ON
Bachelor of Computer Science (Honours, Co-op) — *Class of 2031*

Technical Skills

Languages: C++, Java, Python, TypeScript, JavaScript
Frameworks: React, Next.js, Tailwind CSS, three.js, Node.js, FastAPI, Spring Boot
Cloud & Tools: Firebase, Supabase, Google Cloud, Cloudflare, Vercel, Git, GitHub, Claude Code

Experience

Software Engineer — Sep. 2026 – Present
Marble Investments — *Waterloo, ON*

- Building a news pipeline for the firm's equity research platform that sources, filters, and merges the latest news for every tracked company, with an LLM flagging industry news likely to affect them

Software Engineer, Ground Station — Sep. 2026 – Present
UW Orbital (University of Waterloo Satellite Design Team) — *Waterloo, ON*

- Developing the Mission Control Centre, the ground station web app operators use to send commands to the team's 3U CubeSat and monitor its telemetry
- Building the operator dashboard, combining satellite status, command history, telemetry, and the latest image

Head Trainer — Feb. 2023 – Jun. 2026
Science Olympics Team, Victoria Park C.I. — *Toronto, ON*

- Led 6 trainers for a 60+ member team. All 4 junior teams I coached placed 1st at Western University's Science Olympics
- Created the team's first structured training program and recruited experienced competitors as trainers

C++ Instructor — Jul. 2024 – Aug. 2024
Kurius (nonprofit, 2,200+ members) — *Remote*

- Designed and taught a 5-week introductory C++ course to 11 university students, and every student built a working Library Management System as their final project

Projects

OlympIQ | *Next.js, TypeScript, Firebase, Firestore* | olympiq.ca — May 2026 – Jul. 2026

- Built a scheduling platform for a 60+ member Science Olympics team, replacing 10+ hours of manual spreadsheet work with a custom algorithm that assigns competitors to their preferred events while avoiding conflicts
- Designed and shipped it solo, then piloted it with the executives before the full team adopts it in 2026–27

Suplex | *Python, FastAPI, Shapely, three.js, React* — Hack the Valley 2026

- Led the technical design of a tool that checks any Toronto address against the City's four pre-approved multiplex designs and shows the result in 3D
- Built the rules engine, which screened all 495,456 Toronto lots against the zoning by-law and answers a single address in under 50 ms, plus the FastAPI backend and three.js 3D scene

Flowboard | *Next.js, TypeScript, React Flow, Zustand, Anthropic API* — JAMHacks 2026

- Built a codebase onboarding tool that renders a GitHub repository as an interactive dependency graph, with an AI assistant grounded in the file hierarchy and code excerpts so answers cite the actual codebase

Awards

Hack the North 2026: Best Mobile Experience (Expo)
Hack Canada 2025: Best Use of Gemini AI
Canadian Computing Competition (Senior): Distinction, 2024, 2025, 2026
Competitive Programming: DMOJ Top 2%, USACO Silver, 500+ problems solved
CALICO Informatics Competition (UC Berkeley): Bronze Brick Winner, 2024
St. Lawrence Coding Competition: 1st Place Team, 2024
